SUMMARY

Full-Stack Developer with hands-on experience in building scalable web applications and cloud-native solutions. Completed internship at Cognizant in the EPS IPM Microsoft Azure domain, working with Azure services including API Management, Azure Functions, Service Bus, Logic Apps, App Service, SQL Database, Blob Storage, Key Vault, and Application Insights. Proficient in MERN Stack, RESTful API development, cloud architecture, and event-driven systems. Strong foundation in Data Structures & Algorithms using C++ with a passion for designing secure, scalable, and high-performance applications.

SKILLS

Technical Skills:

- **Languages & Frontend:** C, C++, JavaScript, HTML5, CSS3, React.js
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, JWT auth.
- **Databases:** MongoDB, MySQL , Azure SQL Database.
- **Cloud Technologies:** Microsoft Azure, Azure API Management (APIM), Azure Functions, Azure Service Bus, Azure Logic Apps, Azure SQL Database, Azure Blob Storage, Azure App Service, Azure Key Vault, Application Insights, Log Analytics
- **Tools & Platforms:** Git, GitHub, Postman, Visual Studio, VS Code

Core Skills:

- Data Structures & Algorithms
- Collaboration & Teamwork
- Time Management & Multitasking
- Adaptability & Continuous Learning
- Research & Technical Documentation
- API Design & Development
- Debugging & Optimization
- Event-Driven Architecture

EXPERIENCE

Programmer Analyst Intern – Cognizant Technology Services

EPS IPM – Microsoft Azure Domain | Chennai, India | *[Jan 2026 – May 2026]*

- Worked on cloud-native applications using Microsoft Azure services including API Management, Azure Functions, Service Bus, Logic Apps, SQL Database, Blob Storage, and Key Vault.
- Developed and tested REST APIs, implemented event-driven workflows, and integrated secure cloud services.
- Utilized Azure Key Vault and Managed Identity for secure secret management and authentication.
- Gained hands-on experience in cloud deployment, API security, serverless computing, monitoring, and enterprise application integration.

PROJECTS

ExpensePulse | Event-Driven Cloud Expense Management System

A cloud-native expense management system built using Microsoft Azure services implementing event-driven architecture and serverless computing principles.

- Built a cloud-native expense tracking system using ASP.NET Core Web API, Azure API Management, Service Bus, Azure Functions, SQL Database, Blob Storage, and Logic Apps.
- Implemented asynchronous expense processing, automated PDF receipt generation, budget threshold validation, and email notification workflows.
- Automated confirmation and budget-alert email notifications using Azure Logic Apps and Gmail Connector.

FindNest | A Travel Accommodation Booking Web App

A full-stack web application for discovering and booking accommodations with secure authentication and real-time booking.

- Designed and developed a responsive front-end using Bootstrap, ensuring seamless UX across devices.
- Built a scalable backend with Node and Express with optimized routing and error handling.

PizzaDelight | A Full-Stack Pizza Delivery Web Application

A user-friendly platform enabling online pizza customization, ordering, and real-time inventory management for admins.

- Developed dynamic UI for customer ordering and pizza customization using React.js and styled components.
- Built RESTful APIs using Node.js and Express.js for order processing, inventory updates, and admin operations.

EDUCATION

Yeshwantrao Chavan College of Engineering, Nagpur **2022 – 2026**

Bachelor of Technology (B.Tech) – Computer Science & Engineering

Vijay Nimbalkar Junior College, Nagpur **2022**

Higher Secondary (12th Grade) – 77.17%

Prerna International School, Nagpur **2020**

Secondary Education (10th Grade) – 80.80%
